Policy Document On Environmental and Energy Issues

Swami Vivekananda College is committed to manage energy in a systematic manner to minimize its impact on the environment. Our policy aims to explore renewable energy resources, alleviating the government's burden and finding alternative solutions to the energy crisis. This policy is mandatory for all components of the institution, extending to all stakeholders and activities. By incorporating efficiency and environmental awareness into our daily operations, we fulfill our responsibility to conserve natural resources and limit their usage. The Eco Club, an official platform dedicated to environmental awareness, initiates green projects and conducts literacy programs to save energy and safeguard the environment.

We have outlined several policies to guide our efforts in managing energy usage and minimizing our environmental impact. These include:

- Assessing our energy consumption and evaluating its environmental effects.
- Monitoring CO₂ emissions from our vehicles, and promoting eco-friendly transportation methods such as bicycles and public transport.
- Additionally, we plan to install photovoltaic solar panels, implement LED bulbs campus-wide for energy conservation.
- Establish a systematic waste management mechanism.
- Our commitment extends to rainwater harvesting.
- Tree plantation drives.
- Continuous improvement measures for energy consumption.

Principal I/C
Swami Vivekananda College
P.O. Chandkhira, Dist. Karimganj

To achieve these objectives, we'll ensure the following:

- Necessary resources are available.
- Encourage the use of advanced technology to reduce energy consumption, emissions, and noise.
- Monitoring emerging environmental and energy issues will be a priority.
- We aim to enhance the environmental knowledge and skills of our employees and students through training programs.
- We'll provide information on energy-saving measures.
- Offer opportunities for engagement in environmental protection initiatives, and train through our Eco Club, fostering a "Go Green Save Earth" ethos.

This policy will be communicated internally to students and employees and made accessible to all stakeholders on the institutional website. Regular reviews of the Environment and Energy Policy, objectives, and targets will be conducted by the Eco Club, guided by the college Principal.
